Getting started

1. Check the power switch of your Commodore 64. Make sure it is OFF before inserting or removing the game cartridge.
2. Insert the game cartridge into the Expansion Port of your Commodore 64 and turn the power on.
3. When the title screen appears, select one of the following menu items to switch to the corresponding game mode:

Use your joystick/gamepad to move the marker next to STORY MODE and press fire. Please refer to the descriptions shown later in this manual for a complete description of the other game modes.

4. Once you begin the game, you will be asked to select your character. Use the joystick/gamepad direction keys to highlight any fighter you wish to use and press any fire. Then use again the direction keys to select your favourite color and press any fire again:

IMPORTANT NOTE:

Don't use software reset to restart the game. Use hardware reset instead.

Basic movements

The diagram below shows the eight basic control joystick/gamepad positions and fire buttons that are used in the game.

Player #1 is connected to Joystick Port #2, while Player #2 is connected to Joystick Port #1.

IMPORTANT NOTE:

The diagram shows the joystick/gamepad positions for a player facing to the right. The controls are reversed when facing to the left.

The game accepts two kind of buttons configuration: **one-button** and **two-buttons**. In one-button configuration the *Standard fire* of your joystick/gamepad is used for both punches and kicks, while in two-buttons configuration the *Standard fire* and *Fire 2 (POTX)* are used for punches and kicks respectively. The configuration can be changed by selecting **OPTIONS** in the main menu.

The following is the typical basic moves setup for each of the configurations. Meaning of the move issued can vary from fighter to fighter.

Legend:

-  =standard fire button
-  =punch button (standard fire button)
-  =kick button (fire 2/POTX button)

Ground moves

ONE BUTTON CONFIGURATION	TWO BUTTONS CONFIGURATION
Standing weak punch 	Standing weak punch 
Standing strong punch  	Standing strong punch   or  
Standing strong kick  	Standing weak kick 
Crouching weak kick  	Standing strong kick   or  
Crouching strong punch  	Crouching weak punch  
Crouching strong kick  	Crouching strong punch   or  
	Crouching weak kick  
	Crouching strong kick   or  

Flying moves

ONE BUTTON CONFIGURATION	TWO BUTTONS CONFIGURATION
  for strong punch	any dir. +  for strong punch
any other dir. +  for strong kick	any dir. +  for strong kick

Story mode: The greatest challenge of all times

There are two evil fighters that want to conquer this world: Vega & Geese. They want to team up together and recruit the strongest fighters and use them to create an evil army. A tournament is the perfect way to hide their evil purpose: with the promise of fame and glory, they attract the attention of the strongest fighters all over the world. Many of them are aware of the goal that Vega and Geese want to pursue, but others are unaware of the fate that may await them.

Choose STORY MODE from main menu to join the world tournament. After selecting your favourite character, his story will bring up on screen and the first fight will begin:

Basic knowledge of the fight mechanic

When the match begins, you must use all of your fighting skills to defeat your opponent. Each time you hit, kick or throw your opponent, his energy meter will decrease. Once his energy meter is totally red, he'll be knocked out and you will be declared the winner. Win two out of three rounds and you earn the right to face the next challenger on your way until the battle with the Vega & Geese alliance!

During the fight, the blows can be parried with defense movement. If they are parried by the opponent, his guard break bar, initially full, will progressively decrease until to “break” and start again with reduced capacity. During the break, the opponent will freeze and it will be completely vulnerable for few moments.

Any landed blow can increase the supermoves energy bar of both players. This bar can reach two levels and can be used to issue super moves, documented separately for each fighter (see further in this manual). Level 2 super moves drain more energy than Level 1 super moves.

Throws and holds

When you are near your opponent, you can press  + ,  or  to issue a throw or an hold, depending on the fighter you are using. *Throws* are capable to knock the opponent on the floor with a single move (image on the left), while a *hold* needs you to push fire repeatedly to issue full damage of the move (image on the right).

Combo

When you hit your opponent while they are still stunned from the previous hit, you make a **combo** and you get a bonus for this which consists of an additional score. The more hits you can land on your opponent while he is still stunned, the greater the combo bonus will be. Combos can be made by concatenating more of one weak/strong punches/kicks, issuing special moves and so on.

Cancelling

For all fighters, most weak and strong basic blows are cancellable, i.e., can be substituted on the fly by a special/super move. For example, with Ryu, you can issue a strong punch and, when you are about to hit the opponent effectively, issue an Hado-Ken to cancel the strong punch animation and start the Hado-Ken one. This increases the possibility to make longer combos and more score.

Player is encouraged to use all this mechanics to reach the end of the game more easily. We recommend you to make practice in training mode with all this mechanics so that you'll get the better of your opponent faster.

Versus & training mode

User can select one of the two gameplay modes by selecting VERSUS MODE from main menu.

- 1) Select the fighters you want to use during game
- 2) Select stage where the fighters must play

- 3) Now use player #1 left and right movements to switch from versus mode (TRAINING? NO) and training mode (TRAINING? YES):

When in training mode, player #2 can't be beaten since its energy will never reach the zero, so that the user can train and master his favourite character freely. The user can use the following keyboard buttons to alter training state:

- **RUN/STOP key:** toggle pause mode
- **J key:** toggle player #2 jumping movement
- **R key:** reset game and return to main menu
- **T key:** increase super energy by 1 level

Tournament mode

In the tournament mode, up to 8 players can compete for the SNK vs CAPCOM championship, where fighters fight with each other to determine who is the strongest. After you select TOURNAMENT from the main menu, with the port #2 joystick/gamepad, the first player can select his character. After this has been done, the second player can select his character (always with the port #2 joystick/gamepad), and so on. When everyone has selected their character, highlight END and press fire button to end selection.

If you don't have eight people to play with, the computer will automatically pick other fighters and control them in battles against you.

When the tournament begins, each player will be assigned a preliminary match. Each match is only one round. If you lose, you will fight the losers of the other matches to decide your final ranking. If you win, you will advance to the semi-finals and be one step closer to the championship.

Options mode

The OPTIONS MODE allows you to change certain aspects of the game. When the title screen appears, move marker on OPTIONS menu item and press fire. When the following screen appears, use the direction keys of your joystick/gamepad to change the option items you want.

DIFFICULTY

This option changes the difficulty of the computer opponent. Push the joystick/gamepad left or right to select the desired difficulty level.

TIME LIMIT

This option allows you to turn on or off the time limit. If you select ON, the fighters will have 99 seconds to knock each other out. If you select OFF, the fight will continue until one player is knocked out.

MUSIC

This option allows you to turn on or off music during battles.

SOUND FX

This option allows you to turn on or off sound effects during battles.

JOY MODE

This option allows you to select button configuration for both players.

Fighters list

Following is the list of fighters in the game. The game supports joystick move charging and different supermove levels, so some moves can be issued only if the fighter reached a specific super energy level during fight. Finally, extra attacks are introduced, that is, counter attacks and guard breakers.

Legend:

-  =standard fire button
-  =punch button (standard fire button)
-  =kick button (fire 2/POTX button)
-  =Quarter circle forward (i.e. )
-  =Quarter circle backward (i.e. )
-  =Half circle forward (i.e. )
-  =Half circle backward (i.e. )
-  =Quarter circle backward and then Half circle forward (i.e. )
-  =Dragon punch (or Z-motion) (i.e. )
-  =Inverse Dragon punch (or inverse Z-motion) (i.e. )
-  =Charge back then forward (i.e. hold  for a sec., then )
-  =Charge down then up (i.e. hold  for a sec., then )
-  =Stick back
-  =Stick forward
-  =Stick up-forward
-  =Stick down

RYU

Date of birth: 21/07/1964

Place of birth: JAPAN

Ryu is the man following the path to become a true warrior. What is the meaning of the evil energy building within him? He continues his journey to find the answers and new challenges.
